Work Experience

[Websure](#) | [Front End Developer](#) | [April 2026 - Present, London Area, United Kingdom.](#)

Websure Internal App: An agency management platform with an integrated client portal.

- Implemented session-based authentication with RBAC-driven UI access control and leveraged Next.js Server Actions for secure, type-safe data mutations across internal and client portal surfaces.
- Integrated Clockify API for real-time retainer hour tracking and sync, optimized performance with SWR-based client-side caching, and enforced audience-aware route protection via a centralized proxy layer.

[Gain Solutions](#) | [Front End developer](#) | [April 2025 – March 2026, Mirpur-12, Dhaka.](#)

Gain.io: A CRM web application for managing customer relationships and business workflows.

- Implemented role-based access control for multi-tenant organizations, ensuring secure and scalable collaboration.
- Optimized front-end performance with Next.js and streamlined GraphQL APIs, improving speed and efficiency.
- Enhanced platform configurability with dynamic user management, billing, and notifications, reducing admin effort by 40%.

Payrun: A web-based HR management system for employee management, hiring, and leave approval.

- Contributed to developing role-based access and employee management workflows using Next.js, GraphQL, and Ant Design, ensuring secure and scalable HR operations.
- Optimized front-end performance and data handling with Next.js and GraphQL, enabling fast time tracking, leave management, and insights dashboards.

EasyDesk: A web-based platform for simple and efficient customer support management.

- Contributed to Canned Responses and Knowledge Base, helping the team reply faster to common queries and access solutions easily, improving efficiency by 30%.
- Worked on Feedback Management, streamlining how user feedback is tracked, prioritized, and assigned, increasing responsiveness and team alignment.

EtherTech | Junior Front End Developer | October 2022 – April 2025, Gulshan-1, Dhaka.

Aranya: A B2C Ecommerce web app for a clothing brand called aranya.

- Took full responsibility of the frontend using Next.js, Material UI, Redux, and RTK Query, delivering a seamless shopping experience used by 1000+ daily users.
- Implemented multi-currency support, shipping integrations (eCourier, DHL), geolocation, and secure payments, improving checkout efficiency and boosting conversion rates by 25%.

Mave CMS: SAAS | A headless CMS solution for dynamic websites.

- Developed frontend and core logic for dynamic website building using Next.js and Ant Design, enabling users to create fully customized websites.
- Built interactive components (pages, menus, cards, sliders, forms) for a personalized and responsive user experience, improving content management efficiency.

United Hospital Ltd: A healthcare medical website.

- Developed a user-centric medical website with real-time appointment scheduling and profile management, enhancing patient engagement and accessibility.
- Integrated ERP API and payment processing, streamlining hospital operations and reducing appointment booking friction by 30%.

Certifications

- Command Line in Linux | Coursera
- SQL for Data Science | Coursera
- Probability and Statistics: To p or not to p? | Coursera

Extra-Curricular Activities

- Participated Take off programming contest two times, organized by Computer Programming Club, DIUPC.
- Participated DIU Intra University Programming Contest in association with DIU.
- Valid Member of Daffodil international University Robotics Club.

Honors and Awards

- Recognized as Hustler of the Year for exceptional critical thinking and dedication, consistently delivering innovative software solutions ahead of schedule at EtherTech.
- Awarded Young Star of the Year for outstanding problem-solving skills and commitment to excellence, driving project success and fostering team collaboration at EtherTech.
